Upon further consideration, it has been realized that a further restriction is required between the following inventions under 35USC 121.

I. Group I, species I, claims 1-11, 13-20, 22, 23, and 25-27, drawn to a packaged food product having a seal layer that includes a slip agent.

II. Group II, claim 24, drawn to a packaged food product having a seal layer that has two alternative surface energies.

The seal layer of the packaged food product of Group II does not require a slip agent by applicants own admission. The surface energies could be achieved by other additives or other polymer modifications, not even requiring additives such as energy treatments.

Because these inventions are distinct for the reasons given above, restriction is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
